Drivers Cab '332KK3' Series of Isolation Switches

NEW Generation Latching Selector Switch

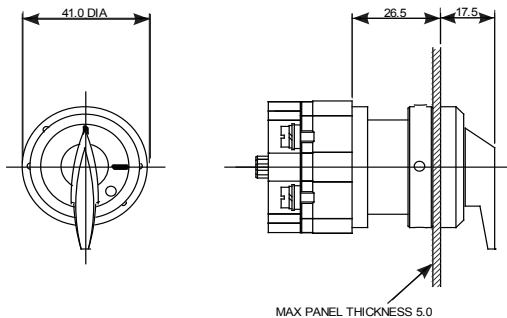

- Latching and non latching versions
- Semi flush - single hole fixing
- 30.5 mm panel fixing
- Aluminium body

The new generation of latching selector switches are designed for isolation of defined circuits and functions. They provide the convenience of single hole fixing with the flexibility of operation without a special key.

Standard Switches give a clear visual indication of normal and operated status and can be supplied with up to 20 normally open or normally closed contacts or an other combination. Bezels can be supplied matt black anodised with white indication or satin chrome with black indication.

Latching switches provide all the features of the standard switches with the addition of a latch in the operated position. Reset to the normal position is only possible with a high security key actuator which is inserted from the front of panel.

Technical Data

Termination	M4 screw & washers
Contact material	Brass with fine silver contacts (gold plated available on request)
AC23A BS EN 60947-3	20A
Short time with stand current (1sec)	400A
DC ratings available on request	

References are given here for simple two position standard switch sequences. Other switch sequences and configurations are also available. Versions for use with drivers master key and combination keys can be supplied to customer order.

	Latching Satin Chrome	Latching Matt Black
2 pole normally open	332KK3-2NO	332KK4-2NO
3 pole normally open	332KK3-3NO	332KK4-3NO
4 pole normally open	332KK3-4NO	332KK4-4NO
6 pole normally open	332KK3-6NO	332KK4-6NO
2 pole normally closed	332KK3-2NC	332KK4-2NC
3 pole normally closed	332KK3-3NC	332KK4-3NC
4 pole normally closed	332KK3-4NC	332KK4-4NC
6 pole normally closed	332KK3-6NC	332KK4-6NC
2 n/o and 2 n/c	332KK3-2NO-2NC	332KK4-2NO-2NC
3 n/o and 3 n/c	332KK3-3NO-3NC	332KK4-3NO-3NC
4 n/o and 4 n/c	332KK3-4NO-4NC	332KK4-4NO-4NC
6 n/o and 6 n/c	332KK3-6NO-6NC	332KK4-6NO-6NC
High security reset key	CDK1	CDK1
